

PRE-SHOOTING

checklist

CAMERA BODY

- Clean the camera body: Make sure the camera body is cleaned so no dust or dirt will go into the sensor when changing lenses. Clean the LCD panels
- Clean the camera sensor: Take a photo of the sky with f16 and check if there are any spots on the image (check it on a PC/Mac at 100% zoom)
- Charge the camera batteries
- Check if there are any photos in the cards, and that you have downloaded them on your PC/Mac. Insert cards in the camera and format them.

LENSES

- Clean the lenses, front and back glass
- Put front and back cup in each lens
- Check that lenses AF is working

FILTERS

- Clean the Filters you will take with you (ND, CPL, GND, Square)
- Check the filters are the right mm for your lenses
- Check your square filter system, that you have the proper adapter rings for your lenses

TRIPOD

- Check the screws are tight
- Check the head is tighten
- Check the camera release plate is on the head or on the camera

DRONE

- Clean the drone (especially the rotors)
- Charge the drone's batteries
- Charge the controller
- Check you have the cable to connect the controller to your smartphone
- Insert the memory card in the drone and format it
- Check the filters are clean and in the filter case

ACTION CAMERA

- Clean the lens and LCD
- Charge batteries
- Insert Memory Card and format it
- Check you have all the mounts and screws you need

ACCESSORIES

- Charge Flash/LED batteries
- Test Flash/LED is operational
- Charge the battery of the remote shutter release
- Charge your mobile phone
- Charge your power bank 10.000mAh
- Charge your electronic blower
- Check headlamp and torch are charged or have fresh batteries
- Check you have clean lens cloth
